

Step1. Please copy the **install** and **install_sp** img files to the USB storage under the root directory.

Step2. Plug USB storage into the SMCWTV100 device, push down the switch button and press the power button at the same time.

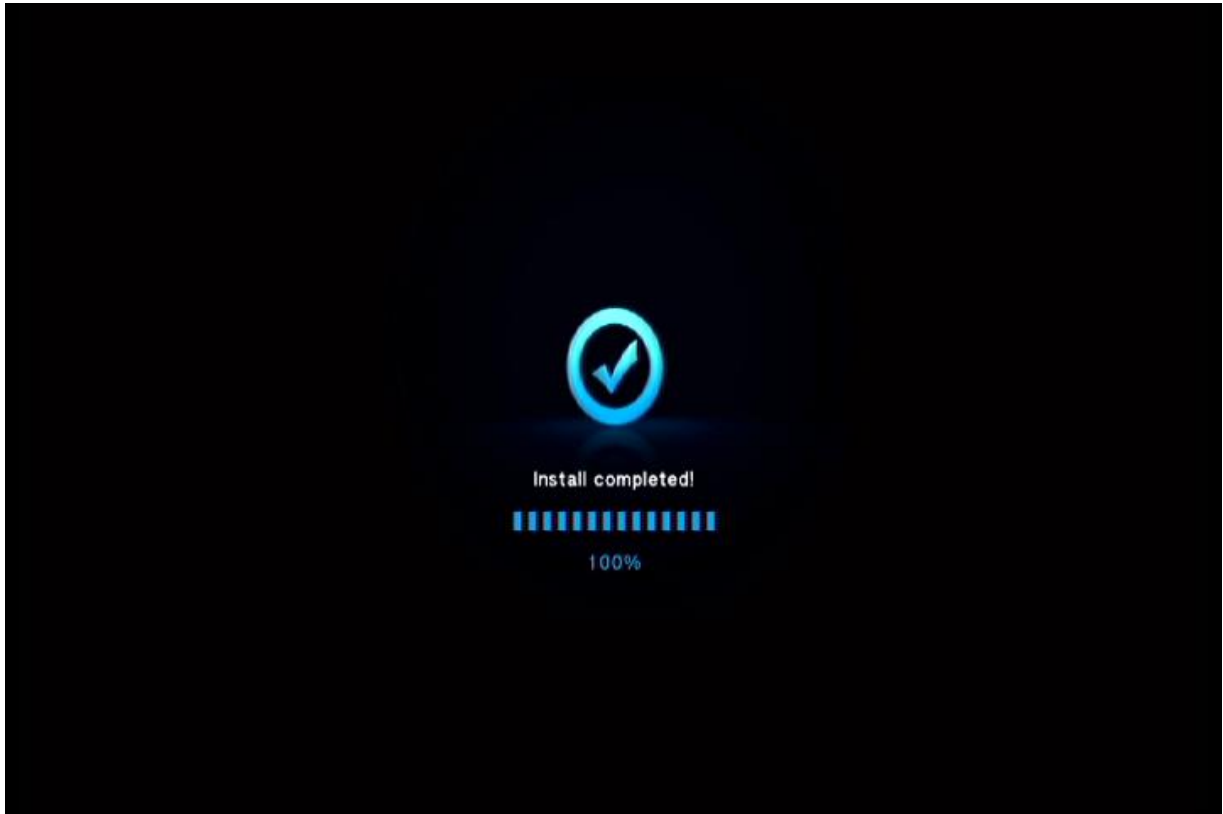

Step3. When you see this screen, you can lift your finger from the switch button, system will now start to upgrade the firmware.

Step4. During firmware upgrade, **do not turn off the power or unplug the USB storage.**

Step5. Firmware upgrade is now completed, at this step, **please do not unplug the USB storage.**

Step6. When you see the screen loaded, this means upgrade is completed, now you can unplug the USB storage.

● Only upgrading the firmware from v1 .x.x to v2.x.x or above needs two img files put in the USB storage.
